

I'm not robot!

locomotives - while increasing the amount of cargo they hauled. Europe's railways have also shown marked, albeit smaller, productivity improvements.

I In America the period of huge productivity gains in transportation may be almost over, but in most countries, the process still has far to go. State ownership of railways and airlines, regulation of freight rates and toleration of anti-competitive practices, such as cargo-handling monopolies, all keep the cost of shipping unnecessarily high and deter international trade. Bringing these barriers down would help the world's economies grow even closer.

Questions 14-17

Reading Passage 90 has six sections, A-I.
Which paragraph contains the following information?

Write the correct letter A-I in boxes 14-17 on your answer sheet.

14. a suggestion for improving trade in the future
15. the effects of the introduction of electronic delivery
16. the similar cost involved in transporting a product from abroad or from a local supplier
17. the weakening relationship between the value of goods and the cost of their delivery

wheat, wood and iron ore, or processed commodities, such as meat and steel. But these sorts of products are heavy and bulky and the cost of transporting them is relatively high.

D Countries still trade disproportionately with their geographic neighbours. Over time, however, world output has shifted into goods whose worth is unrelated to their size and weight. Today, it is finished manufactured products that dominate the flow of trade, and, thanks to technological advances such as lightweight components, manufactured goods themselves have tended to become lighter and less bulky. As a result, less transportation is required for every dollar's worth of imports or exports.

E To see how this influences trade, consider the business of making disk drives for computers. Most of the world's disk-drive manufacturing is concentrated in South-east Asia. This is possible only because disk drives, while valuable, are small and light and so cost little to ship. Computer manufacturers in Japan or Texas will not face hugely bigger freight bills if they import drives from Singapore rather than purchasing them on the domestic market. Distance, therefore, poses no obstacle to the globalisation of the disk-drive industry.

F This is even more true of the fast-growing information industries. Films and compact discs cost little to transport, even by aeroplane. Computer software can be 'exported' without ever loading it onto a ship, simply by transmitting it over telephone lines from one country to another, so freight rates and cargo-handling schedules become insignificant factors in deciding where to make the product. Businesses can locate based on other

Reading inventory answer key. What is meaning reading answers with location. Delivering the goods answer key. Answers of reading delivering the goods. What motivates employees reading answers with location.

14 Answer: I Question Type: Matching Information Answer location: Paragraph I, last line Answer explanation: If you read thoroughly, there's a line in the said paragraph that describes "bringing these barriers down would help the world's economies grow even closer." Here, the author gives a suggestion that in order to improve the trades in the future one should bring the barriers of high shipping costs down. 15 Answer: F Question Type: Matching Information Answer location: Paragraph F, line 3 Answer explanation: Paragraph F claims that "computer software can be 'exported' without ever loading it onto a ship, simply by transmitting it over telephone lines from one country to another, so freight rates and cargo-handling schedules become insignificant factors in deciding where to make the product." Hence, it is mentioned that computer software can be exported without even loading it into ships. 16 Answer: E Question Type: Matching Information Answer location: Paragraph E, 2nd last line Answer explanation: Paragraph E puts forward the information that "This is possible only because disk drives, while valuable, are small and light and so cost little to ship. Computer manufacturers in Japan or Texas will not face hugely bigger freight bills if they import drives from Singapore rather than purchasing them on the domestic market." Here, it is given that computer manufacturers such as Japan or Texas can choose to transport their goods from abroad or from local/ domestic markets without getting perturbed about the cost, as the cost involved in transport is going to be similar. 17 Answer: D Question Type: Matching Information Answer location: Paragraph D, line 2 Answer explanation: The entire sentence has been paraphrased here. In the passage, it states that "Over time, however, world output has shifted into goods whose worth is unrelated to their size and weight." Also, "as a result, less transportation is required for every dollar's worth of imports or exports." Here, we can state that the relationship between the value of goods and the cost of their delivery is weakening as it is given that goods whose worth is unrelated to the size and weight. It can be inferred that the price of some goods does not match with their size and weight. Moreover, less transportation for every dollar's worth infers that the relationship is weakening. 18 Answer: TRUE Question Type: True/False/Not Given Question Answer location: Paragraph A, line 1 Answer explanation: If you read thoroughly, there's a line in the said paragraph that describes "international trade is growing at a startling pace. While the global economy has been expanding at a bit over 3% a year, the volume of trade has been rising at a compound annual rate of about twice that." Here, the term growing can be inferred as increasing and the global economy has been paraphrased as the world economy. Thus, it is correct that international trade is increasing at a greater rate than the world economy. 19 Answer: FALSE Question Type: True/False/Not Given Question Answer location: Paragraph B, last line Answer explanation: If you observe, in the said paragraph author said, "cheap labour may make Chinese clothing competitive in America, but if delays in shipment lie up working capital and cause winter coats to arrive in spring, trade may lose its advantages." Here, we can deduce that according to the author cheap labor may work as a contributory factor but it cannot guarantee an effective trade condition; delivery in proper time guarantees that. 20 Answer: NOT GIVEN Question Type: True/False/Not Given Question Answer location: N/A Answer explanation: None of the passages confirms or denies that Japan imports more meat and steel than France. 21 Answer: TRUE Question Type: True/False/Not Given Question Answer location: Paragraph D, line 1 Answer explanation: The opening line of paragraph D claims that "countries still trade disproportionately with their geographic neighbours." From this information, we can infer that most countries continue to prefer to trade (still trade) with their geographic neighbours (nearby nations). 22 Answer: NOT GIVEN Question Type: True/False/Not Given Question Answer location: N/A Answer explanation: None of the passages confirms or denies that small computer components are manufactured in Germany. 23 Answer: G Question Type: Summary Completion Answer location: Paragraph D, line 2 Answer explanation: Few lines in the said paragraph convey that "over time, however, world output has shifted into goods whose worth is unrelated to their size and weight. Today, it is finished manufactured products that dominate the flow of trade, and, thanks to technological advances such as lightweight components, manufactured goods themselves have tended to become lighter and less bulky." From the given information we can deduce that "dominant" suggests a significant effect and modern methods have made goods simpler and more efficient or effective (lighter and less bulky). Hence, Modern cargo-handling methods (technological advances) have had a significant effect on trade. 24 Answer: B Question Type: Summary Completion Answer location: Paragraph E, 2nd last line Answer explanation: In the said paragraph, you can point out that "computer manufacturers in Japan or Texas will not face hugely bigger freight bills if they import drives from Singapore rather than purchasing them on the domestic market." The manufacturers of computers for example Japan/Texas can buy components from overseas (abroad) rather than relying on local/domestic suppliers. 25 Answer: C Question Type: Summary Completion Answer location: Paragraph H, line 1 Answer explanation: If you read thoroughly, a line in the passage specifies "the shipping container transformed ocean shipping into a highly efficient, intensely competitive business." Since the author mentions that shipping container has transformed the ocean shipping process, we can state that introduction of container ships have changed/transformed the transport efficiency of bulk cargo. 26 Answer: A Question Type: Summary Completion Answer location: Paragraph I, last line Answer explanation: Last line of paragraph I claim that "state ownership of railways and airlines, regulation of freight rates and toleration of anti-competitive practices, such as cargo-handling monopolies, all keep the cost of shipping unnecessarily high and deter international trade. Bringing these barriers down would help the world's economies grow even closer." Here, the writer explains how lowering truck and railroad tariffs can increase productivity and suggests that government should reduce tariffs. This Academic IELTS Reading post focuses on solutions to IELTS Cambridge 6 Reading Test 1 Reading Passage 2 entitled 'Delivering the goods'. This is a targeted post for IELTS candidates who have big problems finding out and understanding Reading Answers in the AC module. This post can guide you the best to understand every Reading answer without much trouble. Finding out IELTS Reading answers is a steady process, and this post will assist you in this respect. IELTS Cambridge 6 Test 1: AC Reading Module Reading Passage 2: Questions 14-26 The headline of the passage: DELIVERING THE GOODS Questions 14-17: Identifying information [This question asks you to find information from the passage and write the number of the paragraph (A, B, C or D....) in the answer sheet. Now, if the question is given in the very first part of the question set, I'd request you not to answer them. It's mainly because this question will not follow any sequence, and so it will surely kill your time. Rather, you should answer all the other questions first. And just like List of Headings, only read the first two lines or last two lines of the expected paragraph initially. If you find the answers, you need not read the middle part. If you don't find answers yet, you can skim the middle part of the paragraph. Keywords will be a useful matter here.] Question no. 14: a suggestion for improving trade in the future Keywords for the question: suggestion, improving trade, in the future, A special TIP: questions like this one where you have to find 'a solution for the coming days / future', you should take a look at the last two paragraphs. You will always find your answers there. For this question, we have to go to the last paragraph and search for solutions or suggestions to improve trade in the future. Take a look at the last lines of paragraph I, ".... Bringing these barriers down would help the world's economies grow even closer." Here, Bringing these barriers down = a suggestion, would help = indicates the future, the world's economies grow even closer = improving trade, So, the answer is: I Question no. 15: the effects of the introduction of electronic delivery Keywords for the question: effects, introduction of electronic delivery, The answer can be found in paragraph F. Here, lines 2-5 say, ".... Computer software can be 'exported' without ever loading it onto a ship, simply by transmitting it over telephone lines from one country to another, so freight rates and cargo-handling schedules become insignificant factors in deciding where to make the product." Here, simply by transmitting it over telephone lines = electronic delivery, so freight rates and cargo-handling schedules become insignificant factors in deciding where to make the product = the effects, So, the answer is: F Question no. 16: the similar cost involved in transporting a product from abroad or from a local supplier Keywords for the question: similar cost, transporting, product, from abroad, from a local supplier, The answer can be found in paragraph E. Take a look at these lines, ".... Computer manufacturers in Japan or Texas will not face hugely bigger freight bills if they import drives from Singapore rather than purchasing them on the domestic market." Here, import drives from Singapore = transporting a product from abroad, domestic market = local supplier. Also, Computer manufacturers in Japan or Texas will not face hugely bigger freight bills means that companies do not want to spend more money on products that are priced the same in a local or foreign market. So, the answer is: E Question no. 17: the weakening relationship between the value of goods and the cost of their delivery Keywords for the question: weakening relationship, between, value of goods, the cost of their delivery, The answer can be found in paragraph D. At the beginning the writer says in lines 1-2, ".... Over time, however, world output has shifted into goods whose worth is unrelated to their size and weight," Then the writer says again in the end, ".... thanks to technological advances such as lightweight components, manufactured goods themselves have tended to become lighter and less bulky. As a result, less transportation is required for every dollar's worth of imports or exports." Here, goods whose worth is unrelated to their size and weight = the price of some goods does not match with their size and weight. Also, less transportation is required for every dollar's worth of imports or exports = the relationship between value of goods and their transportation cost is becoming weak, So, the answer is: D Questions 18-22: TRUE, FALSE, NOT GIVEN [In this type of question, candidates are asked to find out whether: The statement in the question agrees with the information in the passage - TRUE The statement in the question contradicts with the information in the passage - FALSE If there is no information on this - NOT GIVEN For this type of question, you can divide each statement into three independent pieces and make your way through with the answer.] Question no. 18: International trade is increasing at a greater rate than the world economy. Keywords for the question: international trade, increasing, greater rate, than, world economy, The answer can be found in the first lines of paragraph A. The writer says, "International trade is growing at a startling pace. While the global economy has been expanding at a bit over 3% a year, the volume of trade has been rising at a compound annual rate of about twice that." Here, is growing = is increasing, global economy = world economy, So, the answer is: TRUE Question no. 19: Cheap labour guarantees effective trade conditions. Keywords for the question: cheap labour, guarantees, effective trade conditions, The answer can be found in paragraph B. At the end of the paragraph the writer says, ".... Cheap labour may make Chinese clothing competitive in America, but if delays in shipment lie up working capital and cause winter coats to arrive in spring, trade may lose its advantages." Here, the writer means that cheap labour may work as a contributory factor but it cannot guarantee an effective trade condition; delivery in proper time guarantees that. So, the answer is: FALSE Question no. 20: Japan imports more meat and steel than France. Keywords for the question: Japan, imports, more meat and steel, than France, We can find the words Japan, France, meat and steel, in paragraph C. However, we can't find any comparison on the import of meat and steel between Japan and France. So, the answer is: NOT GIVEN Question no. 21: Most countries continue to prefer to trade with nearby nations. Keywords for the question: most countries, continue to prefer, trade, nearby nations, The answer can be found at the very beginning of paragraph D. The author says in line no. 1, Countries still trade disproportionately with their geographic neighbours." Here, still trade = continue to prefer to trade, geographical neighbours = nearby nations, The line is a clear match to the question. So, the answer is: TRUE Question no. 22: Small computer components are manufactured in Germany. Keywords for the question: small computer components, manufactured, Germany, Information about computer components is included in paragraph E. However, Germany is not mentioned in this paragraph. So, the answer is: NOT GIVEN Questions 23-26: Completing summary with list of words: [In this type of question, candidates are asked to complete a summary with a list of words taken from the passage. Candidates must write the correct letter (not the words) as the answers. Keywords and synonyms are important to find answers correctly. Generally, this type of question maintains a sequence. Find the keywords in the passage and you are most likely to find the answers.] Title of the summary: THE TRANSPORT REVOLUTION Question no. 23: Modern cargo-handling methods have had a significant effect on _____ as the business of moving freight around the world becomes increasingly streamlined. Keywords for the question: modern cargo-handling methods, significant effect, moving freight, around the world, increasingly streamlined, The answer can be found in paragraph D. The writer says here, ".... Over time, however, world output has shifted into goods whose worth is unrelated to their size and weight. Today, it is finished manufactured products that dominate the flow of trade, and, thanks to technological advances such as lightweight components, manufactured goods themselves have tended to become lighter and less bulky." Here, dominate = significant effect, streamlined = manufactured goods themselves have tended to become lighter and less bulky, technological advances = modern cargo-handling methods, So, the answer is: G (trade) Question no. 24: Manufacturers of computers, for instance, are able to import _____ from overseas, rather than having to rely on a local supplier. Keywords for the question: manufacturers, computers, able to import, from overseas, than, rely on, local supplier, The answer can be found in paragraphs D and E. In paragraph D, the writer talks about 'lightweight components' as manufactured goods. Then in paragraph E, the writer says, ".... Computer manufacturers in Japan or Texas will not face hugely bigger freight bills if they import drives from Singapore rather than purchasing them on the domestic market." Here, Computer manufacturers in Japan = manufacturers of computers, drives = components, Singapore = overseas, domestic market = local supplier, So, the answer is: B (components) Question no. 25: The introduction of _____ has meant that bulk cargo can be safely and efficiently moved over long distances. Keywords for the question: introduction, meant, bulk cargo, safely, efficiently, moved, long distances, Here, bulk cargo means heavy or large goods transported from one place to other. The author says in paragraph G, ".... Forty years ago, the process of exporting or importing involved a great many stages of handling, which risked portions of the shipment being damaged or stolen along the way. The invention of the container crane made it possible to load and unload containers without capsizing the ship and the adoption of standard container sizes allowed almost any box to be transported on any ship." Here, the invention of the container crane = the introduction of container ships with crane, without capsizing = safely and efficiently, So, the answer is: C (container ships) Question no. 26: While international shipping is now efficient, there is still a need for governments to reduce _____ in order to free up the domestic cargo sector. Keywords for the question: international shipping, efficient, still a need, governments, reduce, in order to, free up, domestic cargo sector, The answer can be found in paragraph H where the writer talks about tariffs. The writer says here, ".... The shipping container transformed ocean shipping into a highly efficient, intensely competitive business. But getting the cargo to and from the dock was a different story. National governments, by and large, kept a much firmer hand on truck and railroad tariffs than on charges for ocean freight. This started changing, however, in the mid-1970s, when America began to deregulate its transportation industry. First airlines, then road haulers and railways, were freed from restrictions on what they could carry, where they could haul it and what price they could charge. Big productivity gains resulted." Here, the writer explains how lowering truck and railroad tariffs can increase productivity and suggests that government should reduce tariffs. So, the answer is: A (tariffs) Click here for solutions to Cambridge 6 AC Test 1 Reading Passage 1 Click here for solutions to Cambridge 6 AC Test 1 Reading Passage 3
